

Machine Learning GATE Readiness - 100 MCQs

Q1. Which algorithm is commonly used for supervised classification?

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

Explanation: Logistic Regression is a supervised classification algorithm.

Q2. Which algorithm is commonly used for supervised classification?

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

Explanation: Logistic Regression is a supervised classification algorithm.

Q3. Which algorithm is commonly used for supervised classification?

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

Explanation: Logistic Regression is a supervised classification algorithm.

Q4. Which algorithm is commonly used for supervised classification?

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

Explanation: Logistic Regression is a supervised classification algorithm.

Q5. Which algorithm is commonly used for supervised classification?

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

Explanation: Logistic Regression is a supervised classification algorithm.

Q6. Which algorithm is commonly used for supervised classification?

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

Explanation: Logistic Regression is a supervised classification algorithm.

Q7. Which algorithm is commonly used for supervised classification?

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

Explanation: Logistic Regression is a supervised classification algorithm.

Q8. Which algorithm is commonly used for supervised classification?

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

Explanation: Logistic Regression is a supervised classification algorithm.

Q9. Which algorithm is commonly used for supervised classification?

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

Explanation: Logistic Regression is a supervised classification algorithm.

Q10. Which algorithm is commonly used for supervised classification?

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

Explanation: Logistic Regression is a supervised classification algorithm.

Q11. Which algorithm is commonly used for supervised classification?

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

Explanation: Logistic Regression is a supervised classification algorithm.

Q12. Which algorithm is commonly used for supervised classification?

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Explanation: Logistic Regression is a supervised classification algorithm.

A) K-Means B) Logistic Regression C) PCA D) Apriori

Answer: B

Explanation: Logistic Regression is a supervised classification algorithm.
